

# Internships at Gut Wehlitz

Our internships are aimed to gaining practical experience so that the participants can get orientation and decision-making support when deciding on their future profession. All courses are divided into the main areas of technology, crafts and services.

There are internships such as office technology, smart home or information technologies, where the focus is on the latest technology developments. The fields of electrical engineering, car mechanics, design, metal and construction are dedicated to professions in the classical craft. The practical courses in gastronomy and kitchen as well as in the hotel and catering trade, provide practical insights into the day-to-day work of service occupations.

Vocational experiences can be collected in addition, within the internships trade and logistics or garden and forestry. Internships such as 3D-printing or E-Buggy construction are aimed at those who like to work with tinkering or technical solutions. In the practical course media production the participants experience that also in the creative range is hard work and in the practical course beauty care learn them that this topic does not exhaust itself alone in the hair care.

## Gut Wehlitz - All under one Roof

The carefully renovated buildings of the historic manor form a living ensemble. It provides the ideal setting for a closely linked interaction between the areas of work, leisure and recreation. Our guiding principle is that all internships are successful and that everyone feels at home at Gut Wehlitz.

---

## Overview about our Internships

### 3D-Print

#### Discover new Technologies

Regardless of whether in medical or dental technology, in specialized small series production or in the manufacture of individual parts with complex geometric shapes - the use of 3D-printing is on the advance. The combination with computer-aided design technologies offers a multitude of innovative application possibilities.

## Beauty Care

### More than simply Styling

The daily care of skin and hair is not limited to hairdressing and make-up alone. A Solid and ready-to-use knowledge is required in order to find individual solutions for the customers. This also includes the application of make-up techniques and the knowledge of cosmetic products.

## Smart Home

### Future-House

The modern home is an intelligent house. In this smart home, home technology and entertainment media, as well as appliances, systems and lamps, are networked. Settings and control are made via smartphone or computer. Proper setup and control requires appropriate specialist knowledge.

## Car-Mechanic

### Looked under the Hood

Only in Germany there are more than 60 million motor vehicles, including 43 million passenger cars, which keep their owners mobile for work and leisure. Modern technology also has to be serviced and repaired at regular intervals. This requires both knowledge of the functioning of all components and skilled craftsmanship.

## Construction

### Work around the House

The demand for apartments has been increasing for years, especially in the growing conurbations. For Germany alone, experts assume that the demand for additional apartments is around 400,000 per year. Crafts in the various building trades will therefore continue to be in demand in the future.

## Metal-Workshop

### An universal Material

Regardless of all IT technology and digital networking, handmade solutions are in demand everywhere. The different types of metalwork play an important role. Especially individually tailored solutions require a broad knowledge ready for application. An important basis for this are the classic work steps in metalworking.

## Interior Construction

### Tiles, Walls and Laminate

When all the exterior walls of a house have been erected, the building is far from finished. Especially in the interior a lot of work has to be done. Irrespective of all machines and technologies, many classic handicraft skills will continue to be in demand in the future.

## E-Buggy-Construction

### A Vehicle is created

This internship requires resourceful minds and skilled hands. The construction of an e-buggy begins with the planning of a concept for the entire vehicle design. Care is required when assembling the frame as well as the drive and control components. But manual skill is also required when sawing, welding and filing.

## Electro-Installation

### Well and safely connected

Neither a smart home nor a normal office can work without a professionally executed electrical installation. It's not just about the correct installation of electrical systems and equipment. The inspection of electrical equipment and machines is just as much a part of the job as antenna and telephone systems.

## Garden and Forestry

### Everything in the green Area

Working with trees, shrubs and plants is the focus of this internship. To ensure that everything grows and thrives as intended, plants must be grown, cultivated and cared for professionally. Until the time is ripe to harvest the proverbial fruits of the work, specially coordinated care measures are necessary.

## Media Production

### On the set and in the studio

Film and media productions play an important role in our media world. The makers in the background take care of the form and content. They must always keep a close eye on their respective target groups. When it comes to film and media productions, they are in constant coordination with her customers and employees.

## Gastronomy and Kitchen

### Really well served

The gastronomy industry certainly does not have to worry about its continued existence. Dedicated newcomers are sought for trendy restaurants as well as bistros, canteens or fast food restaurants. Delicious food and a pleasant atmosphere are not created by themselves and require a great deal of expertise and care.

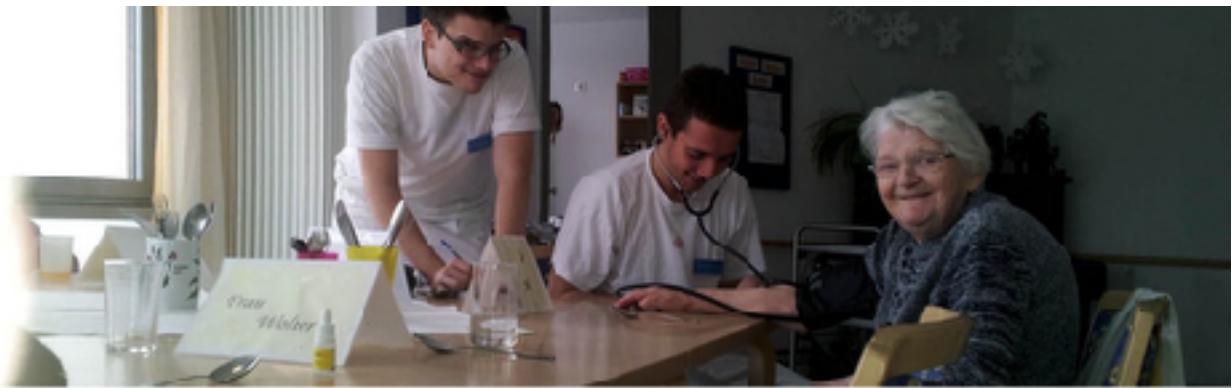

## IT-Technology

### Computer, Bits und Bytes

Computers and networks have taken possession of our everyday work and life. Sophisticated systems are created on the computer as well as online content or graphic design. The basic knowledge therefore includes the safe handling of computer solutions, operating systems and application software.

## Health Care

### Well cared for and looked after

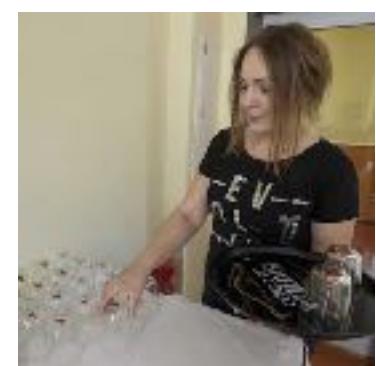

Increased life expectancy means that more and more people in old age are dependent on outside help. Experts predict that there will be a need for 220,000 additional full-time staff in the area of nursing care for the elderly in Germany alone by 2020.

## Hotel Business and Catering

### Hospitality is Priority

No matter whether in a conference hotel with international guests or in a comfortable holiday pension - hospitality is the focus. All visitors should keep a pleasant memory of their stay. This requires competent and careful all-round care from reception to farewell.

## Trade and Logistics

### Everything at the right Place

Logistics means having the right goods - available at the right time, in the right quantity and at the right place. All processes, from delivery and storage to dispatch, must be carefully planned, coordinated and controlled. Logistics plays an important role in our increasingly global everyday world.

## Office-Technology

### Digital Working Life

Our offices and workspaces can no longer be imagined without computers. Complex software solutions help in our daily work, well networked workstations are in demand. This requires a basic knowledge ready for use in order to be able to use the specialised software safely and efficiently in everyday work.
